

MUSIC, MIND, AND BRAIN
Association for Psychological Science 24th Annual Convention
Diverse Perspectives
May 24-27, 2012 in Chicago, IL USA

<http://www.psychologicalscience.org/convention>

Including a special cross-cutting theme program and poster session:

Music, Mind, and Brain

(http://www.psychologicalscience.org/convention/program_2012/search/theme.cfm)

It's just sound - structured, organized sound. Yet it has surrounded us, moved us, and echoed in our memories throughout the history of our species. In this theme program, three of the world's leading psychologists and neuroscientists in the study of music, and one of the world's leading musicians, discuss the psychological systems and "orchestra of brain regions" through which music enriches our lives.

*Including a special concert with Dale Boyle, Kevin Feyen, Robert W. Levenson, Daniel Levitin, Bianca Levy, and featuring **Victor Wooten***

Five-Time Grammy Award Winner and Bassist for Béla Fleck & The Flecktones
